

# BI Office Dynamic Text in Story Board

In BI Office Story Board, **Dynamic Text** allows users to take existing dynamic text reports that were created in Data Discovery and place them into a dashboard. Users can then tie those dynamic elements to other reports inside the Story Board using slicers and interactions. The dynamic report is then editable from inside the slide itself.

## Add Dynamic Content

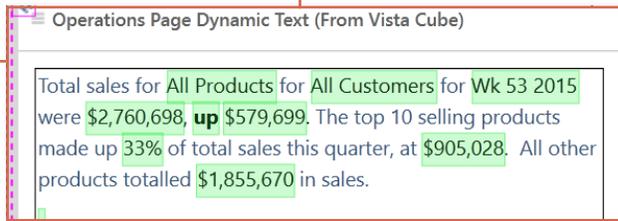

Open a new or existing **Story Board** in edit mode.

Notice the different types of **content** in the panels, which are all tied together with a **slicer**.

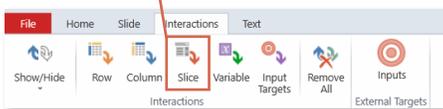

In the empty panel, add the **dynamic text report**. Expand out the **content panel** and drag and drop the **text report** onto the Story Board Canvas.

See the **dynamic content** populate.

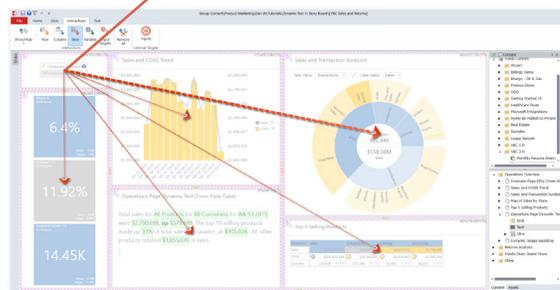

## Create Interactions

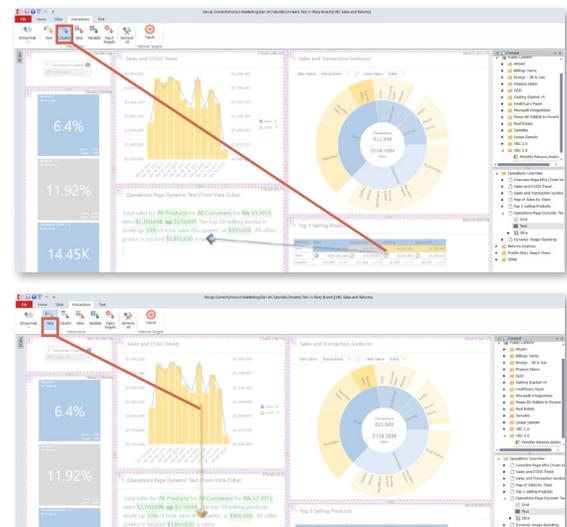

Tie the dynamic content to the rest of the report. From the **Interactions** Tab select the **Slice** button.

Drag and draw an interaction arrow from the **slicer** to the **dynamic text**.

To tie in the rest of the dynamic text elements, drag and drop **Column** and **Row** interactions from other content in the Story Board to the **dynamic text**.

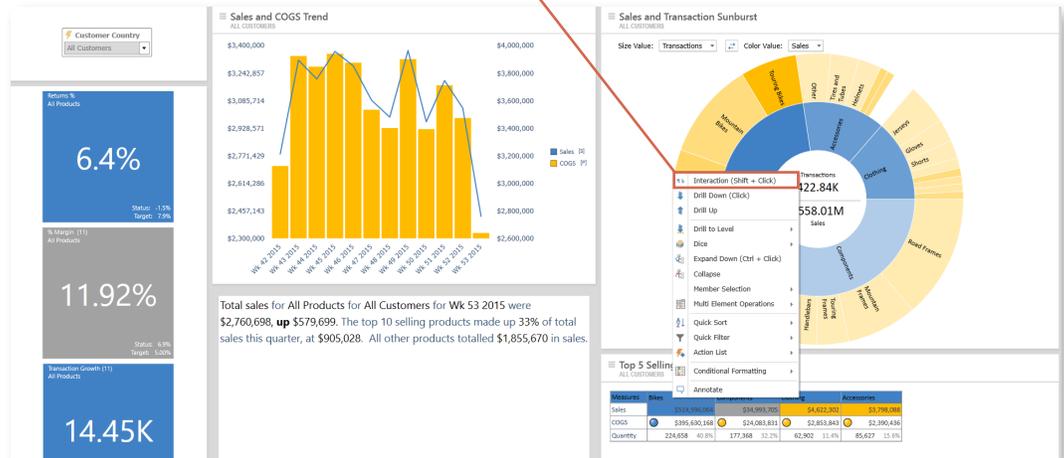

## Test Interactions

From the **Quick Menu**, **Run** the Story Board.

**Right click** on an attribute in the grid and choose **Interaction** to see the dynamic text update and filter.

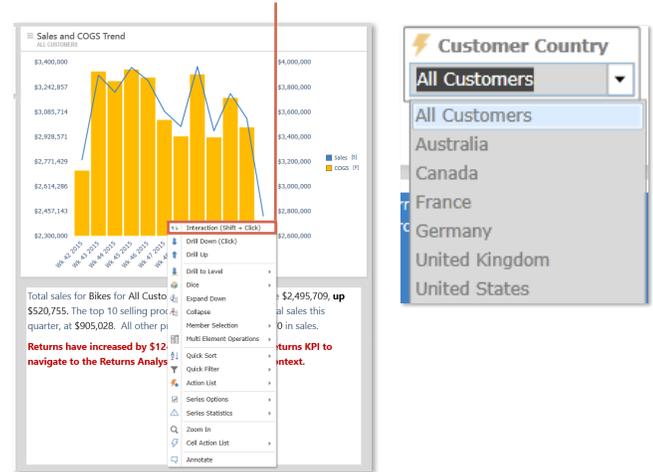

See the **Text** update.

Total sales for Bikes for All Customers for Wk 53 2015 were **\$2,495,709, up \$520,755**. The top 10 selling products made up 33% of total sales this quarter, at \$905,028. All other products totalled \$1,855,670 in sales.

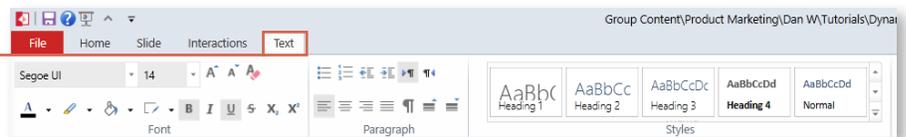

**Returns have increased by \$124,715. Click on the % Returns KPI to navigate to the Returns Analysis page for additional context.**

Further test by launching an **Interaction** from other pieces of **content** and changing the **slider** selection.

## Editing Dynamic Text

In **edit mode**, from the main ribbon navigate to the **Text** tab. From here change the **font** and **style** of any text in the report.

**Highlight** the desired text, and perform **edits** such as applying Bold, Underline, Italics, Font Color, etc.

**Total sales** for All Products for All Customers for Wk 53 2015 were \$2,760,698, **up** \$579,699. The top 10 selling products made up 33% of total sales this quarter, at \$905,028. All other products totalled \$1,855,670 in sales.

**Add text** right within the text panel. **Save** the Story Board for the changes to take affect.
